

# PROPOSED SCIENCE OFFERINGS FOR Rising 9<sup>th</sup> Grade Students for 2010-2011

## Science Dept. Website:

<http://www.dotsonscience.com/coursedescrip.htm>.

The following courses are the courses that we are recommending being offered for the following school year for 9<sup>th</sup> grade students.

The science teachers know that Earth Science and Biology are not math based courses. However, Chemistry and Physics are; thus, requiring certain math skills. We have based our "class pathways" on the math levels to make sure your child is in the right math at the right time and missing a year/semester of science due to not having the math skills.

COURSE DESCRIPTIONS: A brief summary of the 9<sup>th</sup> grade science courses taught at Leesville as well as the teachers to contact if you have questions. This page is extremely helpful when registering for classes.

1. Earth Science-suggested for 9<sup>th</sup> graders if they are taking the recommended math which is Pre-Algebra or Algebra Part I and Algebra I Part II. An Earth Science course is required for graduation. This course is recommended for lower classmen only.
2. Honors Biology- recommended math is Honors Geometry or Geometry. Biology is required for graduation.
